## WORK EXPERIENCE

---

### Cognifyz Technologies

Full Stack Web Development

Dec 2024 - Jan 2025

Gained hands-on experience across various areas of my tech stack through project-based learning. Worked on multiple real-world projects to apply and deepen technical knowledge.

Strengthened skills in:

- Responsive web design
- Database integration (e.g., MongoDB, MySQL)
- Form handling and validation
- Full-stack development practices and workflows using RESTful APIs

## EDUCATION

---

### College of Engineering and Management, Kolaghat

Bachelor of Technology - Computer Science and Engineering - 7.3

June 2023 - June 2027

## PROJECTS

---

### Smart Classroom – E-learning Platform [🔗](#)

Nov 2024 - Jan 2025

Developed a smart E-learning platform designed for both learners and instructors.

Built using **Next.js** and modern web technologies for a fast, scalable experience.

Enables independent access for both user roles within a unified interface.

Key features include:

- Customized learning paths for each student
- Simplified assignment evaluation for instructors
- Integrated **AI assistance** for support and feedback

It aims to be a fully functional and user-ready solution.

## SKILLS

---

Frontend - HTML, CSS, JavaScript, React

Backend - Node.js, Python

Frameworks - Next.js, Django

Databases - MongoDB

## CERTIFICATE

---

### Postman API Fundamentals Student Expert [🔗](#)

This certification proved helpful to learn about using API in CRUD operation using Postman, methods like Get, Post, Put, Delete and so on.
